Let's talk **subsidies**

Construction of equipment for the use of solar energy for the production of electricity

Specific objective:

Improving energy efficiency and renovation of public buildings and supporting the use of renewable energy sources (RES), including devices that are part of the energy supply system of public buildings.

Eligible territory:

All self-governing regions of the Slovak Republic.

Eligible applicants:

- Church organization (Slovakia)
- Foundation (Slovakia)
- Non-profit organization (Slovakia)
- Non-profit organization providing generally beneficial services (Slovakia)
- Municipality (municipal office), city (city hall) (Slovakia)
- Contributory organization (Slovakia)
- Budgetary organization (Slovakia)
- Self-governing region (office of self-governing region) (Slovakia)
- Public research institution (Slovakia)
- Public institution (Slovakia)
- Association (union, association, company, club, etc.) (Slovakia)

Eligibility of activities:

The call supports the implementation of measure 2.1.2 and measure 2.2.2 P SK.

For **measure 2.1.2**, the eligible type of action is **Improving energy efficiency and renovation of public buildings** with the following main activities:

- a) preparation of an energy audit at least for the subject of the project;
- b) development of project documentation on the subject of the project;
- c) insulation of the perimeter shell;
- d) insulation of the roof covering;
- e) replacement of opening structures;

- f) installation / reconstruction / modernization of the heating system;
- g) installation / reconstruction / modernization of cooling and ventilation systems;
- h) installation / reconstruction / modernization of hot water preparation systems;
- i) reconstruction / modernization of lighting;
- j) installation of measurement and control systems;
- k) other measures bringing saving of primary energy;
- l) introduction of energy management;
- m) introduction of operational data monitoring;
- n) implementation of measures improving the quality of the internal environment;
The quality of the indoor environment includes ensuring: exchange (quality) of indoor air, thermal comfort, auditory satisfaction (acoustics), light comfort, health and basic comfort of building use, if basic comfort contributes to the quality of the indoor environment. As part of the basic comfort of using the building, only expenses for floor coverings, interior plasters and paints, interior doors, basic sanitation and related wiring and elimination of health risks are authorized, e.g. mould. Expenses for furniture, carpets and decorative elements are not eligible in this main activity.
- o) implementation of debarrier measures;
- p) installation / reconstruction / modernization of electric charging stations for electromobility;
- q) implementation of aesthetic measures of the "New European Bauhaus";
- r) implementation of green measures (eg green roofs / walls, rainwater utilization systems);
- s) implementation of biodiversity protection measures.

For **measure 2.2.2**, the eligible type of action is **Support for facilities using RES, including facilities that are part of the energy supply system of public buildings** with the following main activities:

- a) installation of equipment using RES;
- b) storage of energy from RES;
- c) introducing systems for monitoring, optimizing and managing energy consumption.

Eligible expenses:

Class 01 – Long-term intangible assets

Group 013 – Software

purchase of software directly related to the measurement and control of equipment operation up to max. 10% of the total authorized expenses (hereinafter referred to as "COV") for the project (ŽoNFP), if it is not part of the equipment supply contract and if it is purchased separately, i.e. that it is not part of the device delivery and its price, including the expenses for the purchase of licenses related to the use of this software.

Class 02 – Long-term tangible assets

Group 021 – Constructions

- preparatory and project documentation
- construction supervision, technical supervision and copyright supervision
- construction works

Group 022 - Individual movables and sets of movables

purchase of machines, devices, equipment, technology and tools, including delivery and installation of equipment and initial training of equipment using RES.

Class 51 - Services

Group 518 – Other services

- expenses for the introduction of energy management (direct expenses), if they are not realized as part of construction works;
- expenses for the introduction of operational data monitoring (direct expenses) if they are not implemented as part of construction works;
- expenses for the development of an energy audit for the subject of the project (direct expenses);
- expenses for the preparation of the energy certificate before and after the implementation of the project (direct expenses);
- expenses for professional inspections / tests / audit reports after project implementation related to putting equipment into operation, if they are not part of the equipment supply contract and if they are procured separately, i.e. that they are not part of the equipment delivery and its valuation.

Indicative call allocation:

Allocation amount EUR 143,700,000

The minimum amount of NFP per applicant's project is **EUR 200,000**.

The maximum amount of NFP per the applicant's project may not exceed **EUR 5,000,000**.

Call schedule:

22.12.2023 until allocation exhaustion

Other:

The provision of contributions under this call is realized in the form of a non-refundable financial contribution (hereinafter referred to as "NFP") on the basis of the submitted ŽonFP and under the conditions established in the call and related documents.

The applicant is entitled to submit several ŽonFP within the call, each with a different subject of the project.

The NFP is provided from ERDF resources in accordance with the rules set out in the current Financing Strategy (specific financing rules applied – financing of activities with a 100% coefficient for calculating support provided for climate

change objectives), while the maximum contribution rate may not exceed the ceiling specified below.

Categorization of eligible call applicants according to contribution rate	Region	Measure	Rate of contribution from P SK sources in % (NFP)		The rate of co-financing from the recipient's sources in %
			EFRR	ŠR	
Subjects of state administration (central bodies of state administration, other central bodies of state administration, state budgetary organizations, state contribution organizations) Other subjects (public institutions, municipalities, higher territorial units and budget organizations and contribution organizations established by them, non-profit organizations, church organizations)	all regions except Bratislava	2.1.2	85	15	0
		2.2.2	85	15	0
	Bratislava Region	2.1.2	40	60	0
		2.2.2	40	60	0
